CROSS-FUNCTIONAL COORDINATION

100%
SOURCE INTEGRITY MAINTAINED

The Gen AI tool integration balanced innovation with system integrity, increasing repository traffic by 3.41% through AI-generated queries while maintaining the knowledge base as the authoritative source of truth.

OBJECTIVES

Resolve Gen AI accuracy issues while preserving the knowledge repository as the trusted source of truth, establishing a sustainable cross-functional process for AI content updates that balanced innovation with system integrity.

Challenges

- Internal AI tool trained on outdated materials providing incorrect information
- Accuracy issues threatening sales effectiveness
- Risk of undermining knowledge repository authority
- Need to balance AI convenience with data integrity

Benefits

- 3.41% increase in repository traffic via AI queries Q1
- Maintained knowledge base as authoritative source
- Established sustainable AI content update process
- Improved sales effectiveness through accurate AI assistance

SOLUTIONS

Root Cause Analysis
Investigated whether accuracy issues stemmed from outdated training data or user behavior patterns through sales team surveys and detailed usage analysis.

Cross-Functional Negotiation
Partnered with Gen AI team, Engineering, Product Managers, and Sales to coordinate AI retraining while maintaining knowledge base authority.

Strategic Prioritization
Chose hybrid approach prioritizing knowledge base integrity over pure AI convenience, ensuring long-term trust in authoritative sources.

Iterative Problem-Solving
When AI updates caused drop in direct knowledge base usage, pivoted to have AI responses link back to source materials.

BENEFITS

Increased Traffic
3.41% increase in repository traffic via AI-generated queries in first quarter demonstrated successful integration driving adoption through new channels.

System Integrity
Successfully maintained knowledge base as authoritative source while enhancing AI accuracy, ensuring long-term trust in both systems.

Sustainable Process
Established repeatable cross-functional framework for future AI content updates, creating scalable approach to AI integration challenges.

Sales Effectiveness
Improved sales team productivity through accurate, AI-assisted information retrieval while maintaining confidence in source materials.
